Realise Your
Gardening
Dreams

THE intelligent robotic lawnmower. SILENO.

The GARDENA SILENO Robotic Lawnmowers are developed with the help of 25 years of experience, this ensures that your lawn care is as easy and effortless as possible. Reliable and fully automatic. You can choose between models connected to GARDENA smart system or via Bluetooth® to be easily and safely controlled with your fingertips via the GARDENA smart* or the GARDENA Bluetooth® App.

GARDENA Robotic Lawnmowers

THE intelligent robotic lawnmower. SILENO.

GARDENA Robotic Lawnmowers are intelligent devices featuring Full Connect, AI-precise and Auto Weather & Terrain benefits and are the quietest in their class. Our smart SILENOs include a piece of hardware called LONA™ Intelligence that enables localisation and navigation of your robotic lawnmower.* Discover the next level of smart lawn care with Location Tracking, Garden Mapping, Zone Management, Area Protect and many more features to come.

Full Connect

Fully connected to the GARDENA smart system. Your garden is taken care of from anywhere**.

AI-precise

LONA™ Intelligence* learns, maps and adapts to your individual garden.

Pro-silent

The quietest, best in class noise level.

Auto Weather & Terrain

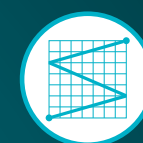

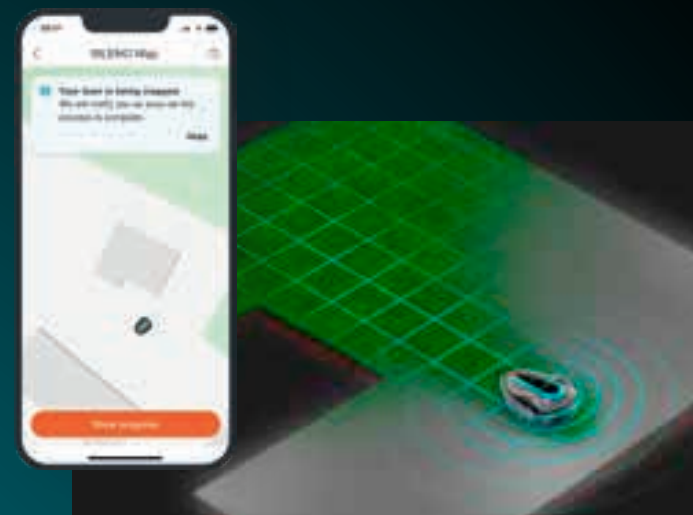

The SILENO works under all weather conditions, rain or sunshine, easy or complex lawns.

** Get the full smart experience with our GARDENA smart range.

* LONA™ Intelligence is only applicable to smart SILENO city and smart SILENO life models.

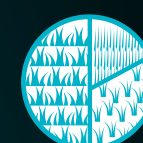

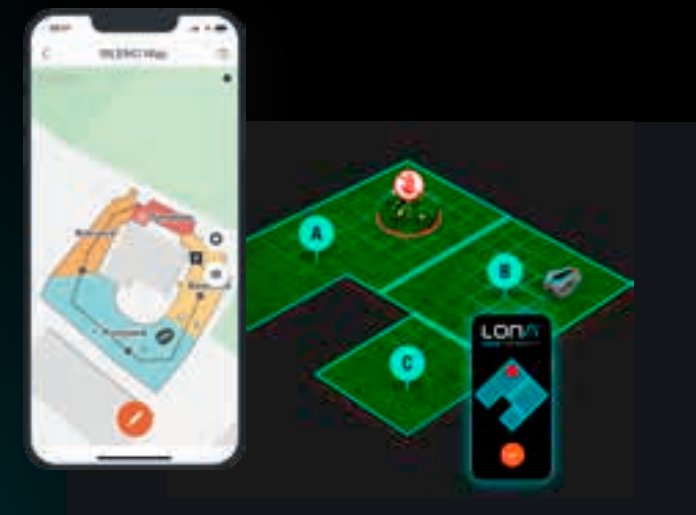

The next level of smart lawn care: LONA™

Experience the next level of smart lawn care. Our smart SILENO Robotic Lawnmower range comes with LONA™ Intelligence, enabling localisation and navigation. It is an AI-based technology with location tracking that learns, maps and adapts to your individual garden. As part of the GARDENA smart App updates, LONA™ Intelligence will continuously evolve and deliver even more exciting and highly relevant product features to maintain your garden in the years to come.

Garden Mapping

Thanks to LONA™ Intelligence, the smart SILENO learns and maps your individual garden and creates a detailed map of the garden layout which can be accessed on the GARDENA smart App. The map shows the outline of the lawn, including boundary wire, guide wire and charging station.

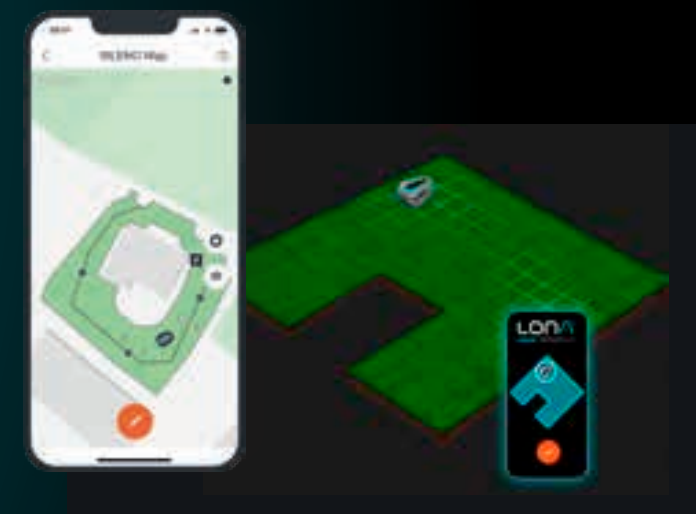

Zone Management

LONA™ Intelligence gives you the control of your lawn care. Easily define multiple virtual zones on the garden map through the GARDENA smart App. Define different mowing intensities and frequencies within these zones according to local conditions and needs.

Area Protect

Easily protect specific areas in your garden from mowing, e.g. wild meadow. LONA™ Intelligence lets you define stay away zones on the garden map which can easily be adjusted on the GARDENA smart App at any time.

Location Tracking

Open the GARDENA smart App and track the live location of your smart SILENO at any time. LONA™ Intelligence locates your robotic lawnmower using GPS and other sensor data.

The SILENO robotic lawnmowers help you to maintain your lawn just right

More features of the SILENO robotic lawnmowers.

CORRIDOR CUT

Mowing even difficult or narrow passages from 60 cm between the boundary wires is no problem thanks to the CorridorCut function. Due to a special mowing pattern the lawn is cut evenly.

UNCOMPLICATED

Simply clean the SILENO using your garden hose. And you are ready to go!

CUSTOMISED

All models also have the SensorControl function: The intelligent cutting system automatically adjusts the mowing time based on grass growth.

CLEVER

With SpotCutting, a spiral mowing function ideal for hard-to-reach areas such as under trampolines or garden furniture.

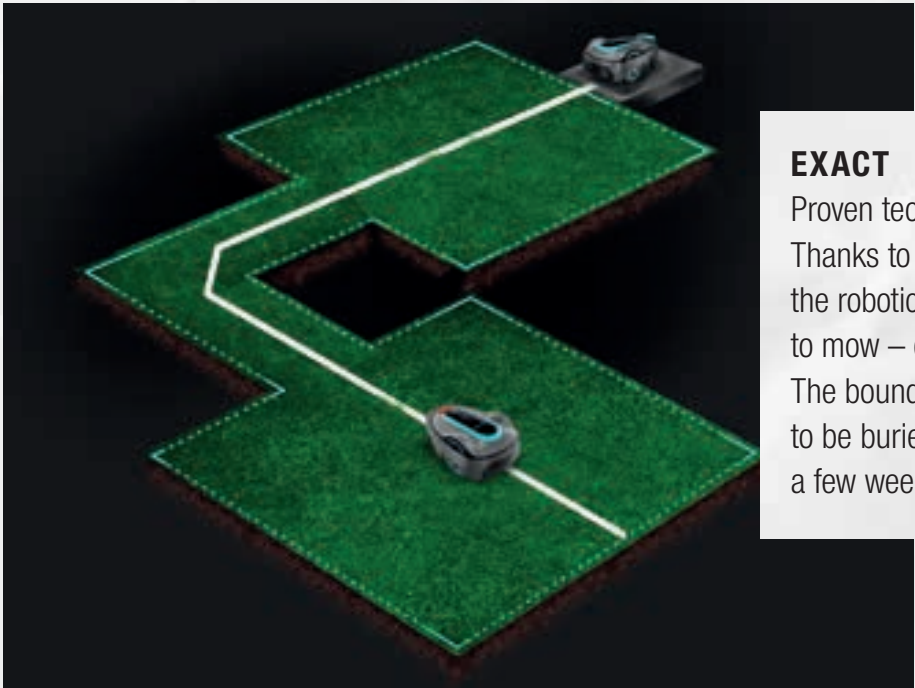

FROST SENSOR

As soon as the outside temperatures approach freezing, the schedule of the robotic lawnmower is suspended. This protects the lawn, as mowing damages the grass when it is frozen.

FLEXIBLE
How much should be cut?
The cutting height can be
adjusted flexibly.

EXACT
Proven technology provides precise results:
Thanks to the GARDENA boundary wire,
the robotic lawnmower knows exactly where
to mow – down to the exact centimeter.
The boundary wire and guide wire do not have
to be buried and will be invisible after
a few weeks as the grass grows over them.

EASY TO INSTALL
Quick and easy installation. Charging station
can be flexibly placed inside or also outside
the mowing area. See our installation video
online for more information.

Accessories

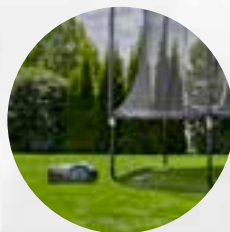

ZoneProtect

A battery-operated boundary signal generator that can be placed anywhere in the designated lawn area. It creates an independent island around an obstacle and does not require connection to the main boundary wire.

New!

ZoneProtect
Suitable for all robotic lawnmowers
Art. No. 15021

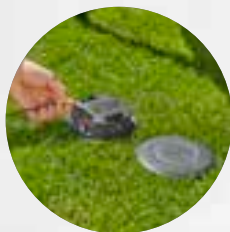

Stay Away Zone

Clever accessory to create a no-mow zone for your SILENO. Install the ZoneProtect around areas you temporarily want to protect, such as children's play area, newly seeded grass and hedgehog protection area.

Battery-operate

The LED indicator shows you the current battery power level. Charge your ZoneProtect with the included USB cable for up to 31 days battery running time. The SILENO stops automatically if the battery is low.

Easy installation

Create a temporary no-mow zone up to maximum 15 meters circumference with cables, hooks and connectors included in the SILENO installation kit.

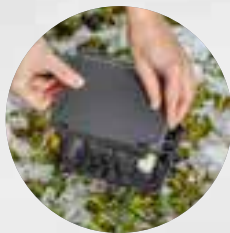

More accessories

Garage for Robotic Lawnmowers
Suitable for all robotic lawnmowers
