

Gardena Customer information on UK-REACH

Under the UK REACH Regulation, certain substances have been identified as Substances of Very High Concern (SVHC) and included on the UK Candidate List. The objective of UK REACH is to ensure a high level of protection for human health and the environment and to promote the substitution of hazardous substances where technically and economically feasible alternatives are available.

Where applicable, UK REACH requires GARDENA to provide customers with information if an article contains a substance listed on the UK Candidate List in a concentration exceeding 0.1% by weight (w/w).

This declaration is based on the UK REACH Candidate List that was valid at the time of its preparation (15 June 2026) . Any amendments to or additions to the Candidate List published after the date of this declaration have not been taken into account in this assessment.

It should be noted that the UK REACH Candidate List currently contains fewer SVHC entries than the corresponding EU REACH Candidate List. Consequently, substances listed as SVHCs under EU REACH may not necessarily be included on the UK REACH Candidate List at the time of this declaration.

Please note that this declaration applies only to products and articles that were marketed or supplied by GARDENA at the time this statement was issued.
